LOOKING FOR CHALLENGING AND GROWTH ORIENTED MEDIUM LEVEL TECHNOLOGY PROGRAMMING POSITION IN THE FIELD OF SYBASE AND T-SQL PROGRAMMING.

PROFESSIONAL SYNOPSIS

- ⇒ 6+ years of work experience as **SYBASE Developer and T-SQL Programmer**
- ⇒ **Having strong knowledge and experience in Data warehousing and BIU concepts**
- ⇒ Having good experience in oracle, sybase, PL/SQL and T-SQL programming.
- ⇒ Having good experience in software Development, Implementation and Maintenance.
- ⇒ Excellent experience in successful design, development and Implementation of web, client-server applications.
- ⇒ Hands on experience in Project Management and good understanding of Software Development Life Cycle.
- ⇒ Experience in database design, data analysis, development
- ⇒ Proven knowledge and experience in creating Data Base Objects and Converting the client Requirements into deliverables focusing on end user and customer requirements
- ⇒ Experience in developing stored procedures, packages, functions, triggers, views and indexes.
- ⇒ Strong programming and debugging skills in PL/SQL, SQL, T-SQL.
- ⇒ Experience in creating sequences, synonyms, materialized views.
- ⇒ Competency in designing technical documentation and suggesting recommendation for enhancement of programs, interfaces, and reports
- ⇒ Having good experience in Core Java, JavaScript.
- ⇒ Excellent quantitative, analytical skills and ability to work either individually or as a member of a team.
- ⇒ Dedicated to meeting client's needs through the use of effective programming methods and coding techniques.
- ⇒ Work synergistically with team members in meeting challenging project goals and deadlines
- ⇒ Experience in and good knowledge in Telecom/Banking/finance/Insurance Domains

WORK EXPERIENCES

1.ICICI Prudential Ltd	Manager-PMS Development	From Nov 2011
2.Growel Softech Ltd	Sybase Developer	From March 2010 to Nov 2011
3. Reliance Communications Ltd	T-SQL Programmer	From Feb 2008 to March 2010
4. VSAI Pvt Ltd	Software Engineer	From Sep 2005 to Jan 2008

Role:

Carrying out all the responsibilities related to Database design, development, optimization, Performance tuning, Sybase Programming.

IT SKILLS

Operating Systems	:	Windows NT/2000/2003/XP, UNIX
Database	:	Oracle9i, SQL, PL/SQL, Sybase IQ, T-SQL
Programming Language	:	C, Java
Web Servers	:	Tomcat 5.0
Java Technologies	:	Core Java, Javascript, XML
Tools	:	SQL*Loader, TOAD, PL/SQL Developer, SQL Developer, SQL Anywhere, Sybase Central

PROJECTS

Project Title: Mynavigator

Role: Manager-Development and Operations

Description: My navigator system provides all information i.e

Targets,Achievement,Credits,Logins,Appointments etc to all the advisors and all Managers.

Attainments

- Developed various Procedures Based on Business Requirements.
- Developed Various Queries, Sub Queries for various Conditions.
- Worked on Performance Tuning for Critical Queries and Modified the Procedures to Optimize the Execution Time.
- Involved On Migration of Huge Data from One Data Base to Other Data Base through ETL tool Informatica and Developed various Declaration Scripts for Updating Data into Target Data Base Tables.
- Prepared Technical Documentation, Test Documentations, Release Documentations Based on SRS
- Involved from the first drop till latest change request.
- Prepared various MIS reports for Management tracking system

Project Title: PMS-Performance Management system

Role: Sybase Developer

Domain:Insurance

Description: This application calculates the performances of agents on yearly, Monthly and day wise.

As per their achievements ,some extra credits will be given on the basis of Product.

Attainments

- Created / modified various Stored Procedures & Functions
- Used SQL indexes to improve SQL performance.
- Performed unit-testing for each developed program
- Created Packages to be called by java
- Optimized SQL queries for better performance
- Created the functional document to design business flow
- Created Database objects such as views, tables, and synonyms.
- Prepared Test plans for various modules
- Prepared user and technical support manual
- Prepared Optimized Complex queries for MIS reports as per Business requirements.

Project Title: BIG TV-DTH

Role: T-SQL Developer

Description: SDP (Service Delivery Platform) is the central database of DTH which consists of SPs, Tables, Views and other attributes of the DTH business. The Application consists of end to end DTH system includes Pre-enablement of service, CAF entry, Service level MACDs and Offer level MACDs. CAF process consists of two sub process as Customer Creation and Service Creation. MACD process includes offer purchase, cancel, suspend and resume of service etc. Systems will interact with each other thru TIBCO as well as direct call thru dblink. The system like Billing and IVR are using the dblink to validate the customer / offer status. Transaction table is used to track the transaction across the system. It also having voucher management system which involves the recharging of customer accounts thru voucher.

Attainments

- Developed various Procedures and Functions Based on Business Requirements.
- Developed Various Queries, Sub Queries and Utilized Oracle Set Operators for various Conditions.
- Worked on Performance Tuning for Critical Queries and Modified the Procedures to Optimize the Execution Time.
- Worked on SQL Loader Concepts for Uploading Data from Data file to Data Base Tables.
- Created Tables, Indexes, Views, Synonyms and other objects .
- Involved On Migration of Huge Data from One Data Base to Other Data Base through Utilizing Data Base Link and Developed various Declaration Scripts for Updating Data into Target Data Base Tables.
- Prepared Technical Documentation, Test Documentations, Release Documentations Based on SRS
- Providing the Support to Production Team, Testing Team (SAT)
- Involved from the first drop till latest change request.

Project Title: DTH-ERECHARGE

Role: TSQL Developer

Description: DTH E-Recharge is the stand alone Electronic Recharge System which involves Customer ERecharge towards their accounts. This systems involves SMS gateway, TIBCO, SDP, Billing and Sales Portal. This SDP will have the dealer information like dealer id, status, parent id, total debit, total credit and their transactions. The amount which is transferred will be updated in SDP and Billing.

Attainments

- Involved in database design physical ,logical database structure and development
- Involved in creation of Functions , Procedures , Sequences , Synonyms , views.
- Turning and monitoring database(database applications turning , which included testing the application and suggesting changes in code so as to improve performances , disk usage , memory and tuning sort operation)
- Prepared Technical Documentation, Test Documentations, Release Documentations Based on SRS
- Providing the Support to Production Team, Testing Team (SAT)
- Involved from the first drop till latest change request.
- Created Database objects such as views, tables, and synonyms.
- Involved in creation of different type of constraints scripts.
- Worked closely with the database developers to ensure adherence of database guidelines, standards and procedures and generated system test plans.
- Worked closely with the administrator for proper backup and recovery plans.

Project Title: DTH-Sales Portal

Role: Sybase Developer

Description: This application consists end to end DTH dealers and their stock status. Using this applications DTH business track their delayers sales and stock status. This system involves SAP interface, SDP and E recharge system.

Attainments

- Created / modified various Stored Procedures & Functions
- Used SQL indexes to improve SQL performance.
- Performed unit-testing for each developed program
- Created Packages to be called by java
- Optimized SQL queries for better performance
- Created the functional document to design business flow

- Created Database objects such as views, tables, and synonyms.
- Prepared Test plans for various modules
- Prepared user and technical support manual
- Prepared Optimized Complex queries for MIS reports as per Business requirements.

Project Title: Claims Processing System

Role: Oracle Developer

Description: The main function of the system is to process the insurance claims. The system gets the data from various modules like provider module , policy module , insurance module etc and finalizes the claim processing

Environment: Oracle 9i, Windows 2000/2003, SQL, PL/SQL, Java

Attainments

- Created / modified various Packages , Stored Procedures & Functions
- Used SQL indexes to improve SQL performance.
- Performed unit-testing for each developed program
- Created Packages to be called by java
- Optimized SQL queries for better performance
- Created the functional document to design business flow using PL/SQL
- Created Database objects such as views, tables, and synonyms.
- Prepared Test plans for various modules
- Prepared user and technical support manual

EDUCATION

B.Tech	Acharya Nagarjuna University	April 2005
Intermediate	Siddhartha college of Arts & science	2000
S.S.C	Viswa bharaathi vidya niketan	1998

PERSONAL PARTICULARS

Date of Birth	:	14 Aug 1983
Contact Address	:	Plot No:51,Sector 1,Koparkhairane,Navi Mumbai.
Permanent Address	:	D.No 18-11-1,5 th line, Kedareswar pet, Vijayawada, Krishna District, Pin-52003, A.P
