- Analyzing the module requirements in close coordination with the team.
- Defining critical paths and developing the project code.
- Preparing and executing the test cases in sync with the business requirements.
- Managing the database and proposing suitable process enhancements to the new products.

◆ Mobile: +91-72596 17573 ◆ rushabhdoshi9@rediffmail.com ◆

- Validating the change requests and defects, tracking the test plans and results, bug fixing.
- Providing post-implementation support to the client ensuring quick resolution of the queries.

Projects Handled

Project 1 :

Client	Citi Canada
Project Title / Name	Unitrax
Project Duration	<i>1 Year (May 2010 - May 2011)</i>
Team Size	<i>100</i>
Software / Tools / Technology Used	<i>RBD,EG,HADOOP,JSF , Windows XP</i>
Project Description:	

CITI CANADA is an investment banking company. Previously Green Screens were used to enter the transaction details, list of investors, types of funds, etc. Now the whole thing is converted to Web-Based Application. For this purpose RBD an IBM tool is being used. The language used in it is EGL . It's a 4th generation Language. For the User Interface JSF is being used. Currently three teams are working in the project onsite and offshore. Retrofit, Roll-out and Multiple Modification. I am currently working as the team lead in Retrofit. Retrofit is the new functional deployment in the already developed screens. Also providing the technical solutions to MM team which is converting the already developed screens to multiple modification screens.

Responsibilities

- Analyzing the functional specifications as per the requirements.
- Developing the project code for the assigned project modules.
- Preparing and executing the test cases.
- Implementing the manual tests on the developed project modules.
- Analyzing the test results to propose suitable process enhancements.
- Verifying the bugs and validating them.
- Providing post-implementation support to the client resolving their technical issues.

Project 2:

Client	Ericsson
Project Type	Telecom
Team Size	15
Technology	Core Java (Eclipse IDE)
Role	Java Developer
Platform	UNIX
Project Participation	June 2011 - December 2011
Project Description:	

ERICSSON one of Sweden's largest companies, is a provider of [telecommunications equipment](#) and data communication systems, and related services, covering a range of technologies, including especially mobile networks.it's a telecom project so domain knowledge was the most essential thing, and as I belonged to the telecom

Background, it was the best playing field for me where I earned technical as well as domain knowledge. It was a network enhancement project so for each node some parameters where predefined with its range, the performance enhancement should be done in such a way that the parameters values should stay in the specified range. So the node's performance stay in predefined limits and can be improved further on.

◆ Mobile: +91-72596 17573 ◆ rushabhdoshi9@rediffmail.com ◆

Responsibilities

- Analyzing the functional specifications as per the requirements.
- Developing the project code for the assigned project modules.

Project 3:

Client	Toronto Dominion (TD WEALTH)
Project Type	BFSI
Team Size	15
Technology	HADOOP,Core Java, JSP, SERVLET,MUREX TESTING,MAVEN
Repository	
Role	Software Development
Project Participation	May 2011 - Sept 2011
Project Description:	

Toronto Dominion is an investment banking company. Various financial institutions gets listed with TD and invest. This project started from scratch so there were lots of opportunities to learn. Both domain and technical expertise were improved to a lot better extent. Got to work on SPRING and Hibernate. Was working for the module delivering institution.

Project 4:

Client	CACIB (Paris - France)
Project Type	BFSI
Team Size	15
Technology	MUREX TESTING,SPARTA [Product Enhancement]
Role	MUREX Testing,Software Product Development
Project Participation	Sept 2011 - till date
Project Description:	

CACIB is an investment banking company. Various financial institutions gets listed with CACIB and invest. Capco had its own tool developed on Swing for UI and Spring bean configuration and Core Java, for Murex Testing. So I was in the integration team working on the same tool, in its enhancement and adding new features to test Murex scenarios end to end. So it was kind of product enhancement and testing Murex functionalities and preparing the test cases.
