Objective:

To achieve a challenging position in Software Development in a result oriented company, where acquired skills and education will be utilized towards continuous growth and advancement with challenging projects.

SUMMARY:

- **3+ years** of Experience in IT Industry in Developing **JAVA** and **J2EE** applications using **JBOSS, Tomcat, Eclipse.**
- Expertise in **Struts Framework**
- Expertise in **J2EE Design Patterns.**
- Good Implementation Knowledge in **J2EE Technologies (JDBC, JSP, Servlets)**
- Good Implementation Knowledge in **Spring (IOC, AOP, DAO)**
- Good Implementation Knowledge in **Hibernate, JPA Framework.**
- Good Implementation Knowledge in **XML (DTD, DOM, SAX, Schema).**
- Implementation Knowledge in **Web Service, EJB2, JSF.**
- Good Knowledge in **Struts2 Framework, EJB3.**
- Knowledge in **Spring MVC.**

PROFESSIONAL SUMMARY:

- Software Engineer in **Cognizant**, Bangalore from May 11 to till date
- Software Engineer in **Capgemini**, Bangalore from Feb 10 to Apr 11

EDUCATION :

- B.Tech(Computer Science And Engineering) from S.I.E.T. Meerut (UP) in May 10

Technical Skills:

Operating System	:	Windows Family.
Languages/Scripts	:	Java, SQL,PL/SQL, JavaScript
RDMS	:	MySQL, Oracle
Web Server	:	Apache Tomcat
Application Server	:	JBoss
J2EE Technologies	:	JDBC, JSP, Servlets
XML Technologies	:	DOM, DTD
Frameworks	:	Hibernate, JSF, Spring, Struts1.x, Struts2.x
IDE	:	Eclipse, My Eclipse, NetBeans
Tools	:	AJAX, JSON, Ant, CVS, JUnit, Log4j, Maven
Web Tools	:	JavaScript, AJAX, JSON

PROJECT PROFILE

Project #1	Electronic Medical Record (EMR)
Client	Advantrix Corp.
Team Size	10
Role	Developer
Duration	Mar 12 to till date
Environment	JSP, Struts, Spring, Hibernate, Eclipse, JBoss

Description:

This is a project for the medical domain developed using MVC architecture. Wherein a doctor and doctor's employees or company employees can login to the system and maintain his patient's records about his medical insurance and about medical history. This system is medical billing software and has features to provide both facilities electronic billing and paper billing. System take care of every patient's claim and store every records until payment not received and also provide feature of rollback of payment. This software works in lots of deferent steps, for each step employees have limited access working to work allotted to him or her. This system also generate final report of unpaid claims, doctor's monthly reports, patient information reports for particular doctor and variable reports according to doctor's requirement in pdf format.

Responsibility:

- Designed JSP's as per the Requirement.
- Implemented Action Classes.
- Implemented Form Beans and their Validations.
- Written Spring Service Interfaces and their implementations.
- Injected Spring Services into Struts Action classes.
- Written Spring DAO's and their implementations With Hibernate.
- Injected Spring DAO's into Spring Services.
- Written Hibernate components.

Project #2	AutoUSA
Client	AutoNation, USA
Team Size	8
Role	Developer
Duration	May 11 to Feb 12
Environmen t	JSP, Struts1, Hibernate, Spring, Eclipse, and Oracle.

Description:

This project is automation of searching for a required brand and model of the car which we want to buy. This project Auto allows a visitor to view or research vehicle information and inventory across the AutoNation Dealer network and submits a request(s) for chosen configurations. The site provides the following functionality: vehicle research, view price quotes, dealer locator, and lead data gathering.

Responsibilities:

- Designed JSP's as per the Requirement.
- Implemented Struts Bean Classes.
- Implemented Beans and their Validations.
- Implemented DAO's with Hibernate.
- Written Hibernate components.

Project #3	Mortgage Plus
Client	Wachovia Bank U.S.A
Team Size	9
Role	Developer
Duration	Nov 10 to Apr 11
Environmen t	JSP, struts 1, EJB2, Hibernate, Eclipse, JBoss, and Oracle.

Description:

The objective of Mortgage Plus (loan against security of collateral for housing purpose) is to cater to the software requirements of the departments involved in sanction and disbursal (pre and post) of loans against the collateral for housing purpose, in order to provide efficient customer service. The end plan is to have Mortgage Plus as a separate system. The system takes the entire flow right from sourcing the application by the sales department with or without the help of DSA through the credit department. In the credit department the loans are sanctioned based on the eligibility criteria of the applicant, to the operations dept. where the disbursements are made and subsequent follow up done for recovery if any.

Responsibilities:

- Designed JSP's as per the Requirement.
- Implemented struts Bean Classes.
- Implemented Beans and their Validations.
- Written Business Delegates.
- Implemented Session Beans.
- Implemented Message Driven Beans and JMS Clients.
- Implemented DAO's with Hibernate.
- Written Hibernate components.

Project #4	Electronic Purchase Order (EPO)
Client	Bloomfieldhills ,Michigan, USA
Team Size	4
Role	Developer
Duration	Feb 10 to Oct 10
Environment	JSP, Servlet, JDBC, JSF, Eclipse, Tomcat, Oracle

Description:

Electronic Purchase Order is a Development project of Pulte, a largest builder of homes in the United States. Pulte tracks the expenditures of each unit of material and labor through its Lawson Accounting System (Existing in COBOL). Pulte is facing problem in tracking expenditures that include breakage, Damage to materials by tradesmen performing other jobs etc. These unbudgeted expenditures must be identified, assigned to appropriate codes, approved and be paid (Charged back to vendor).

In response to this problem, EPO a web based solution was developed automated the creation, Approval and tracking the payment of these exceptional.

Responsibilities:

- Implemented JSP's for the Presentation
- Implemented Servlets for the controller logic
- Implemented JDBC Components for the persistence logic
- Implemented Client side validation using JavaScript
- Implemented Based on MVC Architecture
