Tata Consultancy Services

Project #1:

Project	IPDAY1 – ULZ Initiatives
Period	June 2012 –Till date
Client	Bank of America. USA.
Role	Team Member
Line of business of the client	Banking
About the Client	Bank of America, headquartered in Charlotte, is one of the largest banks in the world. Bank of America provides several products and services to its customers. Other than customer savings account, they provide Merchant services, credit card, mortgage and many other products. Bank of America has entered into a Master Agreement with TATA Consultancy Services to utilize its offshore development services.
About the project	Universal Landing Zone (ULZ) receives and processes image based transactions captured from multiple front-end channels, such as ATMs, RDSO etc. Bank of America customers are able to perform check deposits at the ATM and Teller Counters without any need for deposit slips or envelopes. The information of the deposit along with the image of the check is supplied electronically to the ULZ system for processing the deposited transaction. Automatic recognition of the amount and the check information takes place in the ULZ system. ULZ associates may view check images and check information at the same time for verification purposes. If a correction is made to an Image ATM deposit, the correction notice is sent to the customer. This notice is called Advice notice that will have an embedded image of the deposited item(s) and details of the correction made to the customer's account. After the processing by

	the ULZ system, the details of the deposit information are sent to the CPCS system (external to ULZ). The CPCS system posts the deposits (credit/debit) to the customer accounts.
Responsibilities	<ul style="list-style-type: none"> • Involving in major Development and enhancement tasks • Providing value adds to the application • Prepare HLDs, LLDs and Project related documents • Testing the system at Unit, Integration and System level • Perform testing and deployment of update packages sent by third party software provider • Communicate with the Onsite • Participate in onsite/offshore/client meeting
Operating System	Windows XP/Vista, Windows Server 2008
Languages	Java, C#, Informix, Sql server 2008, Oracle, HTML, XML
Work Location	TATA Consultancy Services, Bangalore

Project #2:

Project	Security Review Management
Period	March-2011-May-2012
Client	Ameriprise
Role	Team Member
Line of business of the client	Banking
About the project	Any third party vendor who wants to do business with Ameriprise needs to go under various information security reviews as per standard guidelines of the bank. SRM team sends out standard questionnaires to third party vendors for their applications. The vendors return the filled in questionnaires and SRM team reviews those for all compliance checks. After completion of review, the SRM team shares review comments with the vendor. It also provides suggestions for closing security gaps if any. Only once the SRM team gives a green status to a vendor or an application that vendor goes with next steps for carrying out business with the bank. The whole workflow is tracked through Archer and an in-house portal which together act as central source of truth between vendor representative, bank LOB and the SRM team.
Responsibilities	<ul style="list-style-type: none"> • Involving in major Development and enhancement tasks of the in-house portal • Providing value adds to the application • Prepare HLDs, LLDs and Project related documents • Testing the system at Unit, Integration and System level • Perform administrative role for Archer
