- Started working on mobile browser project.

Mar'12 - July'12	
<b>Project:</b>	Mobile Text Banking
<b>Client</b>	Union Bank of California
<b>Environment:</b>	Core Java, J2ee, Struts2, JSP, SQL
<b>Role:</b>	Developer

**Brief description of the project:**

Text Banking is a simple way to get specific account information; such as account balance or transaction history via (SMS) Text Message in seconds through any text message enabled device. The user sends a text message requesting information on their account and they will be returned with their account balance after they enter the 6 digit unique code sent to them.

Responsible for:

- Development of welcome page and overlay page and functionality
- Preparation of understanding document, unit test cases and unit testing
- Code review fixes and bug fixes

Dec'11 - Feb'12	
<b>Project:</b>	User Access Review
<b>Client:</b>	Swissre Insurance
<b>Environment:</b>	Core Java, J2ee(Struts), GWT, Oracle9i
<b>Role:</b>	Developer

**Brief description of the project:**

The User Access Review (UAM) Tool provides the Requestor with the ability to review the users and remove or retain them and review the applications within corporate solutions. The UAR tool will also help the managers to certify the users quarterly and generate report.

Responsible for:

- Functionality changes and UI changes.
- Preparing the unit test cases and System Testing, Integration Testing.
- Preparation of click stream document.
- Clean up of the unwanted code and Co-ordination with the onsite co-ordinator.

Jul'11 - Nov'11	
<b>Project:</b>	User Access Management
<b>Client</b>	Swissre Insurance
<b>Environment:</b>	Core Java, J2ee Hibernate - Struts, GWT, Oracle9i
<b>Role:</b>	Maintainence

#### **Brief description of the project:**

The User Access Management (UAM) Tool provides the Requestor with the ability to request application access/removal to applications used by both internal and external users. The UAM tool will provide visibility to the applications users have access to, including information such as Levels of Authority, Releasing Authority, and Reserving Authority.

Responsible for:

- UI changes and functionality changes
- Preparing the unit test cases and unit testing
- Co-ordination with the onsite co-ordinator

Dec'10 - Feb'11	
<b>Project:</b>	L&H Content Migration
<b>Client</b>	Swissre Insurance
<b>Environment:</b>	Oracle9i and Documentum, Informatica 8.6.1,
<b>Role:</b>	ETL Developer

#### **Brief description of the project:**

The Document contents and meta data in the application that are stored in Docbase are extracted, transformed and finally loaded to centralized docbase in structured way specified by the client, using migration tool called Buldoser. The loaded documents and meta-data are verified.

Responsible for:

- Perform data loading in production environment.
- Developed mapping to load the data and Review the loaded data.

- Developed internal java tools for meta data update and verification of loaded data in Docbase using DQL's
- Update the meta-data in staging and docbase and Verification.
- Entire process document preparation and Client interaction

<b>Jul'10 - Nov'10, March'11 - June'11</b>	
<b>Project:</b>	DocSpace Development
<b>Client</b>	Swissre Insurance
<b>Environment:</b>	Java, GWT, Documentum, Oracle 9i
<b>Role:</b>	Maintenance

#### **Brief description of the project:**

Docspace is a web based collaboration application for document management system. It involves modules such as import, check in, check-out etc..The user interface was developed in GWT, and transaction management was developed in JPA under Websphere as application server.

Responsible for:

- Testing—been in testing team for 3 months. Involved in finding the defects of the developed application. Writing Unit test cases for many modules and testing the same.
- Maintenance—I have been involved in working on AQ team comments. Exception handling,
- Adding loggers, Bug fixing.
