Email : rohithindustani2004@gmail.com

Career Objective

To work in an environment that fully utilizes my interpersonal and academic skills, to contribute my ability towards the growth and development of progressive company and to pursue a challenging and rewarding career.

Academic Details

Degree	Year	College/University	Percentage
B. Tech (CSE)	2009	NIT Bhopal	7.37/10
XII	2003	Kendriya Vidayala NFC – New Delhi	77.20 %
X	2001	Kendriya Vidayala NFC – New Delhi	70.40 %

Employment Details

- Current Employer – NetApp, Bangalore - From Oct 2010 to July 2012.
- Previous Employer – Persistent System, Pune – worked since July 2009 to June 2010

Technical Skill Set

Language	C, C++, Perl, OOPS concepts.
Operating System	Linux, Windows.
Good Knowledge of	<ul style="list-style-type: none">• Data Structures.• Algorithms.• Computer Networks.• Operating System.
IDE's	Visual Studio.

Work Experience	
Company Name	NetApp
Designation	Member of Technical Staff (Storage Efficiency)
Project Name	OnCommand
Duration	Oct 2010 to till date
Technical Requirements	C, C++ on Linux and Windows
Team Size	16
Responsibilities	Development of an efficient Data Storage and retrieval.
Details	<p>OnCommand</p> <p>This is a management software use to manage and configure a huge cluster (50-100) of ONTAPs. It provides a CLI and A GUI for the storage administrator to view and configure, setup rules and role for users for any particular storage device (ONTAP).</p> <p>My Role:</p> <p>I am working as a developer in C and C++. My major role is to write programs for discovery and monitoring of nodes and its storage objects (like virtual servers, aggregates, volumes, LUN etc.) on the server. Also trigger run to update the data in server within a stipulated time period. If admin wants to move some data from one controller to another, how to do that directly from the server without actually disturbing the controllers. Along with this I have also written automation scripts (in Perl) for testing the Product.</p>

Company Name	Persistent System Limited
Designation	Software Engineer
Project Name	True Position's – Uplink Time Difference of Arrival
Duration	July 2009 to June 2010
Technical Requirements	C, C++ and SQL on Windows
Team Size	25
Responsibilities	Development of UTDA to trace a mobile phone in a network.
Details	<p>The project is about a software development for True position. This software is used to trace the location of any particular wireless device using the signal received by the device. The location of the device is determined by its receiving signals to more than three base station antennas. The software is very useful for security purpose. The whole development is based on C and C++ with excess use of Data structure and Algorithm concepts, also requires good knowledge of computer networking as well. On this project I am working with a team of 4 members.</p> <p>My Role:</p> <p>I worked as C/C++ developer- I have joined as a fresher, in a huge team, for a product which is already quite matured. So my scope is very limited only to fix defects as per the testing team reports and found into beta phase of the release.</p>

Achievements & Extracurricular
