PROJECT:

1. GRADS(Global Receivables and Disbursement System)

Client : Royal Bank of Canada

Environment : J2EE (Struts) **Duration** : Feb 2011 - Till Date **Skill/Tools** : Struts, Jsp , EJB

Role : Application Programmer

Team Size : 5

Domain : Core Banking

Abstract:

GRADS enables RBC's business clients to either debit or credit their customers at any Financial Institution located either in Canada or USA in Canadian or US currencies.

GRADS delivery system can be divided into two categories

- 1) Pre Authorised Debit(Receivables) service and
- 2) Payment Distribution Service(Disbursement)

In the case of Pre-Authorised Debits, based on the pre-authorised written consent obtained by the business client from his cusomers, payments are collected from the customers account(debit) and credited to the client's account.

Payment Distribution Service(PDS) is a GRADS service which is offered to allow business clients to distribute funds to their customers. Business clients may have recurring payments and managing these may be time consuming and costly for them. PDS automatically deposits recurring payments directly to the accounts of the business clients' customers.

GRADS has approximately 12, 000 clients with approximately 21,000 GRADS accounts and processess approintately 34,000,000 payments per month for customers in Global Banking.

Roles and Responsibilities:

- Estimation
- Analysis & Documentation(Understanding documents, Technical Specs and UTP)
- Coding
