Version Control Tools: Clear Case ,Clear Quest

Professional experience
Duration   : Sep2010-Till Date
Organisation: IBM India Pvt. Ltd.
Designation: Associate System Engineer

Project	IBM Blue Harmony
Role, Duration	Application Developer December 2010- till date
Technologies	Websphere Message Broker,Websphere Message Queue,IBM DB2,Core Java ,J2EE

Details	**IBM's** major transformation program to radically simplify the design and operation of three Globally Integrated Support Processes - Finance, Opportunity-to-Order, and Order-to-Cash will be implemented on a single, virtual instance of SAP. Blue Harmony, tackles some of IBM's more persistent problems and sets the stage for Globally Integrated Enterprise by: 1. Improving the ease of doing business for clients, especially Business Partners, by simplifying and standardizing processes. 2. Optimizing operations across the IBM enterprise while addressing the unique needs of Business Units (Bus) and countries. 3. Reducing operation costs, not only though simplification, but also through retirement of legacy applications. It will design common business processes in four Business Process Domains: 1) Opportunity to Order (O2O) 2) Order to Cash (O2C) 3) Finance4)MDM(Master Data Management) It is IBM's one the biggest SAP implementation project and integration project.
Key responsibilities	1.Creating the technical design documents. 2.Developing the message flows and creating Message Sets,WSDL files using Java,SQL and ESQL 3.Quality reviewing of the code and the documents 4.Have played a role of mentor in MDM domain 5.Have build all the common components like Error Handler ,Common Logger etc as per the requirement in MDM domain where we have highly interacted with IBM DB2 6.Have worked as performance enhancer for the objects in MDM domain. 7.Have integrated SAP systems with Legacy Systems using Webservices(Created Adapter Connection) 8.Have ineracted heavily with the Database systems in the message flows
