Operating System	Windows, DOS	4 yrs
Database	IBM DB2	4 yrs
Tools/ Configuration Management	Tortoise SVN	4 yrs

WORK EXPERIENCE

Tech Mahindra Ltd
September 2008 to Till Date
Project Details:
Project name : Stimer

Environment : Windows, IBM DB2, Oracle Weblogic

STIMER is a tax application for the Ministry of Finance, Belgium. The application is part of around 100 such applications developed for the ministry based on the CCFF framework developed by UNYSIS. STIMER application deals with the accounting and recovery part of ministry functions.

Roles and Responsibilities:

- Analyzing the Requirements and designing the **web layer solution** for the requirements. I started to code on the Action layer using the Struts framework and most of the coding was done reading the High Level Design and the Use Cases shared by the client.
- Joined as a Fresher in the Project after completing my ITP(training program at TechM). I began working on HTML, CSS and JavaScript alongside the Ajax frameworks.
- Core layer coding and JUnit testing.The JUnit test cases were done before starting the coding as per the client guideliness. I moved to core layer code development after gaining complete exposure on the web layer and started working on stateless session beans.
- Worked at onshore office in belgium alongside the client developers and artichects and gained the exposure to the internal workings of project and grasped the detail functioning of the interaction between different modules.

WORKSHOPS/TRAINING PROGRAMS ATTENDED

- TechMahindra: ITP training in Pune from Sep 2008 to January 2009

HOBBIES AND INTERESTS

- Listening music and reading books.
- Playing football and cricket.
