Career Profile

Period	Organization	Role
21st Dec 2009 – Till Date	TATA Consultancy Services	Systems Engineer

Assignments

Project	Visa Tracker System-Ultimatix
Period	21st Dec 2009 – 20th Aug 2011
Description	Ultimatix is TCS's digital platform. This closely kept project has been put together by the TCS, to cut down the layers of decision making within the organisation. It entails digitisation of the whole organisation end to end in real time through the web with every single employee connected through this process across the world in all facilities and offices. By integrating finance, human resources, payrolls, sales and business development, TCS employees, predominantly software engineers will be instilled with a new fervour of ownership and will continuously seek product improvements. This will be supported by an extranet which will allow a smooth HR interface in real time. Visa Tracker System is an application under Ultimatix,Which can be used for initiating the Visa request and tracking the flow of request.
Role	Designing,Developing,Testing &Deployment
Responsibilities	Requirement Gathering, Designing,Testing,Involved in Deployment Activities.
Solution Environment	Java, JSP,JSF,PL/SQL,EJB.
Tools	Eclipse,weblogic 9.2 &10.3, PL/SQL,VSS.

Project	Platform Tools Team
Period	20th Aug 2011– Till date
Description	TCS' Platform Solutions leverage its IT, IS and service delivery capabilities, infrastructure strengths, and access to new technology and process acumen to provide pay-as-you-use business solutions that enable scalability, flexibility and cost predictability to cope with dynamic business needs.Tools team work for multiple java based product under this unit, which will be used by multiple customers like tata sky,ambuja cements ,dow chemicals & tata chemicals etc.
Role	Designing , Developing,Testing & Deployment.
