Technical Experience Summary Table

Technology	
Data Warehousing	Yes
Databases	Sql Server 2005, Sybase IQ 12.7
Trainings attended	
Trainings Imparted	• Database basic trainings to the people of **D**irectorate of **D**ata **M**anagement. 1. All the tables information and how they are getting populated. 2. Relating the fields of the tables with the business logic. • Domain training to the team members(Statistic and Cognos Team).
Programming Languages	Sql,PL/Sql,T-Sql
Domain Knowledge	Retirement System, Central Excise,Service Tax and Customs

Key Projects

1. CBEC-DWH (Central Board of Excise and Custom)

Description	CBEC is a central government project. It mainly deals with three major domains (Customs, Central excise and Service Tax).
Role	ETL Developer
Operating System(s)	Windows
Technologies	Sybase IQ 12.7, Informatica Power Center 8.6.0, Cognos, Unix
Contribution	➢ Joined as a SQL developer and was responsible to create tables, procedures. Involved in unit testing, UAT and code migration from Development to Production Environment. ➢ After delivery of the project, was involved in enhancement and support. Got responsibility to manage two major activities i.e data loading activity and data request activity. ➢ Data loading activity is of weekly and monthly. There are three different sources and this activity is done twice in weekly activity and once in monthly. Depends on this activity reports are refreshed (monthly) and intimate to the client so that users can see the fresh data. ➢ Data request activity is the priority on top. End users send their data request. We analyze the request, if the data can be extracted from the portal, we guide the user through the helpdesk team else we extract the data(either from Sybase by running the query or from Cognos) and send the data to the user. ➢ To provide the data, we need to follow certain processes, so I am responsible to lead the helpdesk team and ETL team for guiding the user or to extract the data. We work as a good team and take guidance from each other always to meet the requirements.
Start Date	Apr'10

End Date	Till Date

2. MPAS (Marryland Pension Administration System)

Description	MPAS describes Maryland Pension Administration System. This project is based on retirement and pension process. In Maryland State, an employee becomes a SRA (State Retirement Agency) member based on certain criteria. So he becomes a vested member and then chooses retirement plan; option and his/her beneficiaries. And when he gets retire then will get his/her benefits. The scope of this project includes documenting the "as is" business processes, including the utilization of any automated systems that support those business processes currently being used by the MSRA (Maryland SRA).
Role	Developer
Operating System(s)	Windows
Technologies	.Net and SQL Server 2005
Contribution	➢ Write stored procedure according to the document made by the requirement team (Mainframe People). ➢ Debug and test the code to match the result with the LPS (Legacy Pension system) system. ➢ Analyze and fix the issue. ➢ Responsible for performance tuning.
Start Date	Feb'08
End Date	Apr'09
