OBJECTIVE

To achieve success in technological services through innovative strategies, technical expertise from a sustainable growth-model that promotes creativity, nurtures innovation. To work in an environment that provides a platform to put my skill sets to test and achieve the desirable deliverables.

Professional Summary

- I have 2.7 years of Experience in the IT Industry, currently designated as an Associate Consultant in Polaris Financial Technology Ltd since September'10.
- Experience in developing web applications in JAVA, J2EE.
- Extensively worked on understanding the business requirements.
- Excellent Knowledge in JAVA, Collection Framework, JSF, Hibernate.
- Flexibility and adaptability in regards with new technologies and environments. Willing to work as a key player in challenging and creative environment.
- Acquaintance with JUnit testing tool.
- Basic knowledge of 'Spring'.
- Extensive knowledge in Tax Domain Of Banking Services.

SKILL SET

Programming Languages	Java
Web-Technology	J2EE
Framework	JSF, Hibernate
Database	Oracle
Application Server	WAS, Tomcat
Build Tools	Ant
Tool	RAD, Eclipse, TOAD, IBM Content Manger, SQL Developer, WID
Operating environments	Windows, AIX
Domain	Investment Banking
Testing Tool	JUnit 3.8.1 , DBUnit 2.4.8

PROJECT DESCRIPTION

1. Project	**GBNP(Global Notional Pooling)**
Role	Team Member
Organization	Polaris Financial Technology Ltd
Duration	November 2012 to date
Team Size	9

Tools	RAD(Rational Application Developer) 7.0, Junit 3.8.1, DbUnit 2.4.8, JACOCO
Client	Citibank

Description:

GBNP system is developed to automate the transactions of CITI Bank across different branches in different currencies existing in different countries. This system is used to calculate the net position of the pool, calculate the interest on net position and generate physical interest and reallocation movements to the relevant customer accounts. GBNP system contains several partner systems to perform different transactions such as IRAS (Interest Rate System) to calculate the interest of different banks and different accounts, AS (Account Server) which contains the information of different accounts of different sectors such as financial institutions, individual customers, different firms and corporate clients. MIS (Management Information System) which is used to provide the automated billing via connection with a region billing system. At present it is implemented in different European countries and in U.S.

Responsibilities:

- Preparing test scripts and scripts review of team members
- Execution of Test Cases

2. Project	**TRS (Tax Reclaim System)**
Role	Developer
Organization	Polaris Financial Technology Ltd
Duration	February 2012 to October 2012
Team Size	10
Environment	JDK1.5, JSF1.2, Richfaces3.3.1, Oracle10g, Hibernate3.0., JUnit, Annotation, WAS 6.1, WPS 7.0
Client	Citibank

Description:

TRS Application is used for calculating reclaim for Beneficiary owners. It's is an application via which it's specified users calculate and publish reclaimed amount according to the tax treaty rates applied for the Beneficiary owners in specific market, and process amount to the enrolled beneficial owners having safekeeping accounts in their respective banks

Responsibilities:

- Developer
- Analysis of the functional specification and requirements provided by client and Estimation.
- Interacting with customer and gathering the requirements for various change requests in Process Flow
- Preparing technical specifications (requirement and design documents) required by the team.
- Coding and code review of team members
- Writing Unit Test Cases

3. Project	**Taxminder**
Role	Developer
Organization	Polaris Financial Technology Ltd

Duration	April 2011 to January 2012
Team Size	7
Environment	JDK1.4, JSF1.2, Icefaces, Oracle10g, Hibernate3.0 , WAS 6.0
Client	Citibank

Description:

TaxMinder Application is used as a Document Storage and Management System. It's is an application via which it's specified users who manage legally important documents pertaining to international investments done in listed markets or countries by the enrolled beneficial owners having safekeeping accounts in their respective banks.

Responsibilities:

- Developer
- Analysis of the functional specification and requirements provided by client and Estimation.
